About Us

About EPRI Solutions

EPRI Solutions, Inc. provides an integrated portfolio of engineering services, business consulting, and information products to clients across the entire power industry value chain... from generation through transmission and distribution to end-use. Our services and products help our clients meet today's technical, financial, and organizational challenges—improving operational efficiency, enhancing customer satisfaction, and increasing profitability.

EPRI Solutions' team of multi-disciplinary professionals—including world-class experts in numerous areas—has built a solid track record of success by leveraging industry best practices, unique laboratory facilities, and the science and technology resources of our parent organization, the Electric Power Research Institute (EPRI).

History and Ownership

EPRI Solutions is a wholly owned, independently managed subsidiary of EPRI. During the past decade, EPRI expanded its activities beyond its core business of collaborative research and development through the formation of taxable subsidiaries. In January 2005, two existing EPRI subsidiaries—EPRIsolutions, Inc. and EPRI PEAC Corporation—were merged to form EPRI Solutions.

EPRI PEAC (Power Electronics Applications Center) was established in 1986 to facilitate the widespread and practical use of power electronics technologies to improve the quality, efficiency, and productivity of electricity. PEAC evolved into an international power quality resource for electric utilities and their customers.

EPRIsolutions was formed in 1999 through the merger of two former EPRI subsidiaries, EPRICSG and EPRIGEN. EPRIsolutions was created to provide customized

technology application, training, and consulting services, conduct proprietary research and development, and work with third parties to commercialize EPRI technologies.

LOCATIONS

EPRI Solutions' headquarters office is located in Knoxville, Tennessee. The company has several additional facilities across the United States—click here for a complete list of office locations.

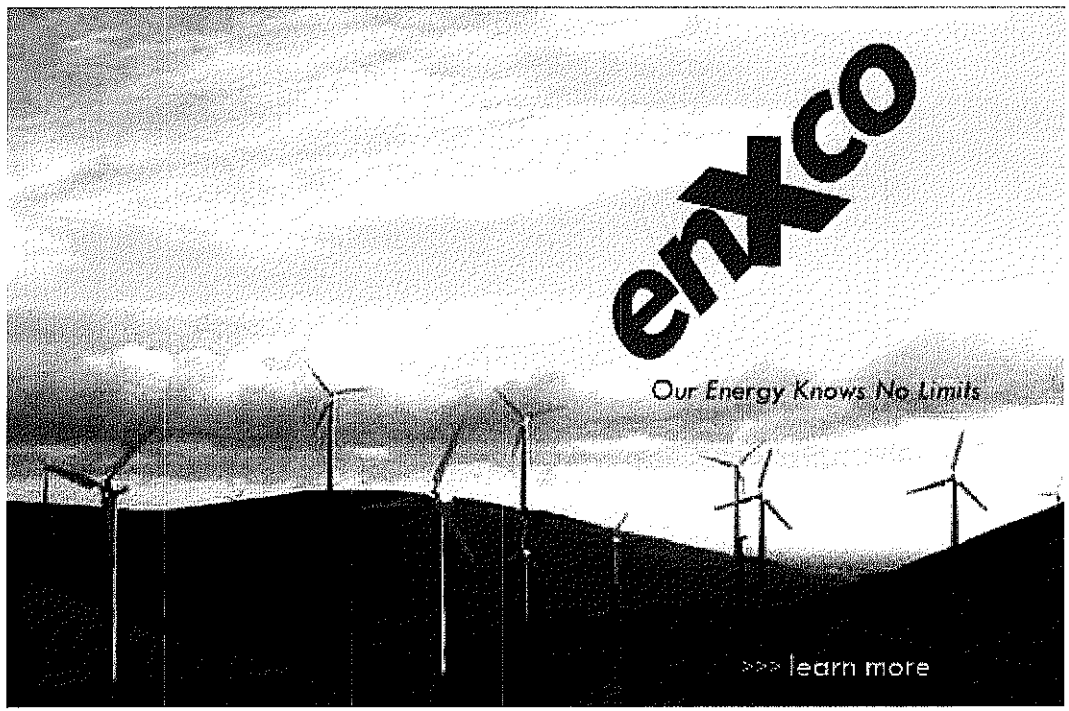
about enXco | services | news center | understanding wind | contact

enXco develops, builds, operates and manages wind energy projects throughout North America.

The power of enXco comes from the experience and quality of its people, and from its capability as a full service wind energy company.



"Wind energy is the world's fastest-growing energy technology."

source: U.S. Department of Energy, 2004

>> read more wind facts

People have utilized the power of wind for thousands of years. Wind has propelled ships, pumped water, ground grain, and performed a multitude of tasks over the millennia. The advantages of wind as a source of energy remain constant throughout time - it is renewable, and clean. Today, wind is also an economical source of energy for our growing economy.

ABOUT EDF

NEWS

At **EasEnergy** we believe that companies thrive when they have the right people and partnerships for the long term. Through our Access Program we offer companies access to expertise, people and market opportunity in the energy industry, especially in Europe, leveraging the strength of the Electricité de France (EDF) Group corporate family. By taking equity, we share the risk and help companies conserve cash while they grow.

Since 2000 we have been investing resources in emerging North American energy technology and service companies. Today, with a **portfolio of over ten companies** we are known in the venture community for helping companies thrive in their local and international markets. If you are an energy technology or service company or if you are an investor in such a company and want to know how we can help, we invite you to contact us and learn more about our **Expertise** and **Services**.

Who we are

EasEnergy is the North American venture arm of **Electricité de France** (EDF) Group, a global leader in energy and industrial services in 24 countries. Since 2000, EasEnergy has been offering access to **expertise** and markets for innovative energy technology companies based in North America.

Who we work with

We build partnerships with innovative energy companies with a broad range of products and services that have applications with the EDF Group and its customers. Our **portfolio companies** have successfully used our resources to accelerate their growth in the USA and to gain early access to international opportunities via the EDF Group.

What we deliver

We provide our portfolio companies with highly trained technical, operational and commercial professionals who deeply understand technology and markets. Through them and our management team we also provide access to the EDF Group and its partners in Europe and worldwide. With our equity compensation model, companies can grow while conserving cash and resources.
